

T8056

OPTIMUM SAFETY MAXIMUM PRODUCTIVITY

True, one-operator capability makes the John Bean® T8056 the productivity workhorse you need if you regularly work on heavy-duty tubeless, tube type, single or multi-piece, Budd, and Dayton wheels.

Utilizing a remote-control console, the John Bean T8056 allows a single technician to work on tires and OTR wheel assemblies up to 92.5 inches in maximum diameter; clamping wheels of 32 inches or 56 inches diameter, with optional extensions, safely and easily.

The two-speed, self-centering, four-jaw, hydraulically operated chuck grips wheels with authority. We've designed the T8056 with an all-in-one bead breaker, mount/demount head assembly that makes quick work of even the toughest tires. For heavy-duty wheels and tires this is the ultimate in productivity, safety, and precision.

Be FAST

HEAVY-DUTY TIRE CHANGER

MOBILE CONTROL UNIT

Wired remote control console allows one technician to safely monitor all tire changing operations.

NON-RETURN VALVE

A non-return safety valve prevents the chuck from opening in case of a sudden hydraulic pressure drop.

BEAD BREAKER

The bead breaker disk is equipped with a special tilting system to assist bead breaking and ensure the disk is in the optimum position.

CHUCK

The self-centering hydraulic chuck is of solid design to accommodate wheels up to 3,300 pounds (1,500 kg).

WHEN GOOD ENOUGH ISN'T ENOUGH, JB.
